

Denuvo Cyber Services

A 360-degree security approach to reduce and streamline your legal team's workload

Intellectual Property (IP) is the lifeblood of the gaming industry

Safeguard your developers' creativity and hard work

Protect names and logos associated with your game, as well as its characters

Secure your developer team's well-deserved revenue

Open up additional monetization opportunities for your titles

No developer or their legal team wants their IP to be violated from day one!

Denuvo Cyber Services provide a comprehensive protection with:

Leak and IP Ecosystem Protection

Legal and Enforcement Support

Game and Threat Intelligence

How do we help reduce and streamline your legal team's workload?

IP landscape monitoring

We enable game developers, publishers and distributors to identify and eliminate IP violations as well as counterfeit risks that jeopardize their revenues.

Network of law enforcement agencies

We identify and deliver the required information to advance the case with law enforcement agencies.

Legal case support and evidence gathering

- We perform in-depth targeted and technical investigations under custom conditions utilizing our industry leading investigative team.
- We collect admissible evidence, including technical forensic evidence and intelligence, while adhering to GDPR.
- We provide expert witness testimony and assist legal teams with the enforcement process, including search and seizure support.

We have established a strong network with industry standard agencies and many more!

 **EUROPOL**

Act fast – IP violation may cost you more money, time and effort than you think!
