

The right driver in the right truck on the right route, every time

With Irdeto Keystone, a truly keyless solution, providing secured vehicle access for shared mobility, even when vehicles are not in network coverage area.

Remote Key Management:
Digital keys can be distributed remotely

Privileges can be enforced on the keys. Expiration time, geo-fence, vehicle access limitations, etc.

Physical keys are replaced with digital keys on a mobile device

Each digital key is unique and can be used without a network connection – allowing for specific access, usage and tracking

- Purpose built for Commercial Fleets
- Easily applied digital key solution
- Streamline operations
- Web-based dispatch, no more waiting in line or lost keys

- Significant reduction in Total Cost of Operation (TCO)
- Cyber-resilient using Irdeto's world class security
- Vehicle brand agnostic: Install on a variety of vehicles

Keystone by Irdeto is the only fleet-purposed, cyber-resilient, easily-applied digital key solution that completely eliminates physical keys. It will help you to reduce the total cost of ownership and maximize the efficiency of your fleet.

You can now Manage the Keys and Driver Access to a diverse fleet - all across America - in an instant with your smart phone or laptop!

Irdeto is the world leader in digital platform security offering cyber services and technology solutions that protect platforms, digital assets and software applications across multiple industries. Irdeto's products meet the rapidly changing mobility demands and exceed cybersecurity regulations for automotive, rail and beyond. We provide solutions throughout the product lifecycle to prevent cyberattacks and help protect assets for connected cars, commercial fleet, rail and construction equipment. With a rich heritage of security innovation and rapid adaptation to the changing demands of the cyber security space, Irdeto is the preferred partner to empower a secure world where people can connect with confidence.
